SchoolQ Staff Guide

Queue Control: skip, transfer, recall, no-show

Queue Control shows one card for each department. Use the buttons when a parent does not come or goes to the wrong desk.

Steps

1. Open **Queue Control**. Each card shows **NOW SERVING** and **UP NEXT**. Click **Call Next** to call the next ticket.

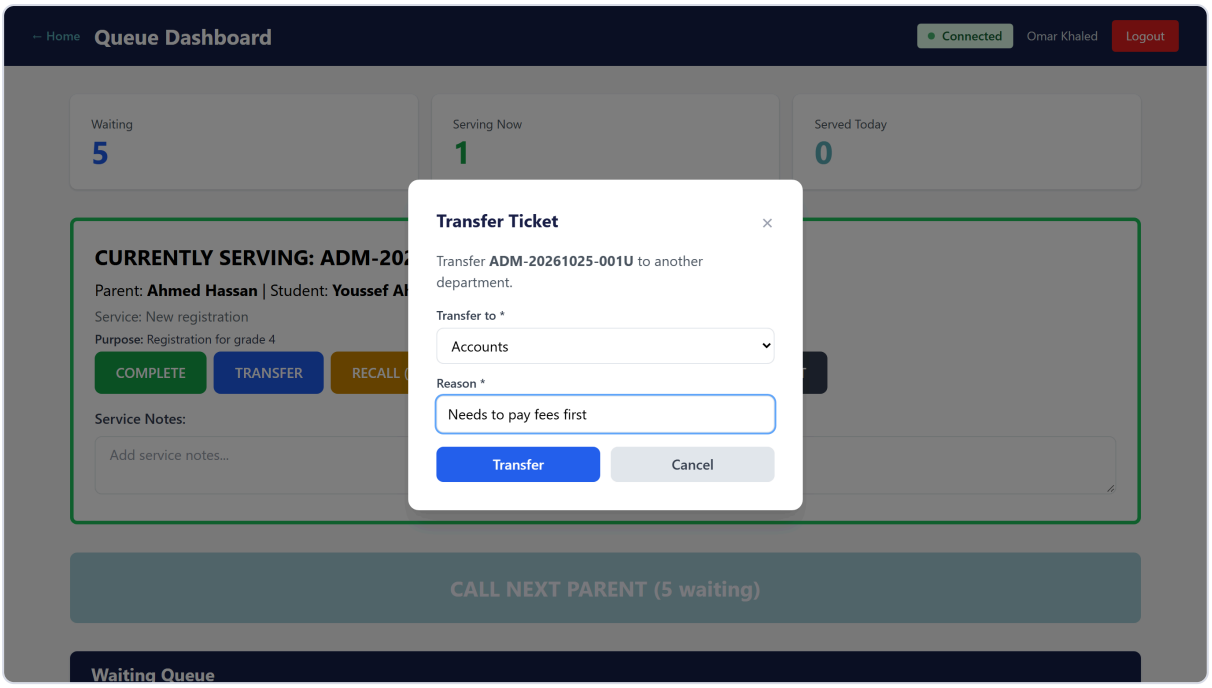

2. **Complete**: the parent is finished.

3. **Recall**: calls the same ticket again.

4. **Skip**: sends the ticket to the end of the queue. The number of calls goes back to zero.

5. **No-Show**: use it when the parent never came. It unlocks only after the ticket was called the set number of times (the button shows, for example, 2/3). The default is 3 calls.

6 **Transfer**: moves the ticket to another department. Write a reason. The ticket number stays the same.

Good to know

- Check the ticket number before you press a button.
- To cancel a ticket because the parent left, use **CANCEL / LEFT** on the Queue Dashboard. You must write a reason, and you cannot undo it.
- No-Show is final. If you are not sure, use Skip.
